

February 2021

Greetings From Grenada!

God is abundantly faithful and good! This month, I began a youth girls' Sunday school class for ages 12-21 with six in attendance. Their initial excitement is evident but please pray that they will continue to come and learn truths from God's Word. Pray for their salvation, spiritual growth, and the unique life situations. Pray that the class would also grow in number.

The customs, paperwork, and initial setup costs were much more expensive than was anticipated, but I truly appreciate every church and individual that has given in my behalf.

During my first few weeks in Grenada, I struggled with stomach issues, likely from the water. Now that my water filter is functional those problems have subsided. Overall, my health conditions have improved quite a bit! I have actually been able to enjoy some Grenadian foods without allergic reactions. I was able to try the national dish called "oil down," saltfish, callaloo, and nutmeg ice cream.

Please pray as I continue to adjust to the culture and surroundings of the island. Two frogs and countless spiders have found their way into my house. Though Grenada is currently entering its dry, cooler season, the heat is still a challenge for me. I am thankful for the almost constant sea breeze God provides.

I thank the LORD for you! Thanks for your faithful prayers and financial support.

Sincerely,
Rebekah Childers
Missionary to Grenada
