

Praise the Lord! On behalf of our church family, I want to express our heartfelt appreciation and thanks to all who helped, prayed, and contributed financially or with food, and muscle to the construction of Wone Baptist Church. I told the men who came out to help today that it usually takes us most of the day on a Saturday to pour cement for one pillar. Today, because all of the help from our seven Baptist churches, it took us less than two hours to complete the rest of the pillars and two sides of the church building's bond beam! We didn't even know it, but one of the local construction companies (church member) brought additional manpower AND their cement mixer, so the work was accomplished quickly. We praise the Lord for His supply of finances, a will to work, and success on today's project. May our God receive all the praise! Thank you all for your part in today's work.
