ASSISTING WITH CHURCH PLANTING, FURLOUGH RELIEF AND MAINTENANCE

June 2013

Dear Faithful Friends,

We are so excited about all that the Lord is doing to bring the Nukuoran people His Word. We have presented the ministry in several new churches and God is working. A church in Ohio has promised to purchase a solar panel that will be used to provide lights and fans for the new church building. We will need to take a total of four panels as well as the inverters, storage batteries, wiring, and other supplies. A missionary on Yap, who is very experienced with using solar power, has offered to help us locate the necessary supplies. Please pray that we will be able to purchase them soon. The total cost will be approximately \$1200.00. This will enable us to have some power for our own use as well.

There is another church in Mississippi that has expressed interest in supplying some of our household needs. We will be taking camping equipment to get started with and use it until we can build a home. Homes there are usually a concrete or bamboo floor with either tin or thatched sides. The roof is generally tin. Our cooking will be done outside under a tin awning and the bathroom will be similar to an outhouse. We are beginning to store things to put into a container for shipment. Anyone interested in helping to supply these needs can contact us for a current list.

We have been in touch with a student at Harvest Baptist College in Guam who desires to go with us to Nukuoro to help with the youth. He has been recommended by the administrator of the school. Please pray for this young man. It is a wonderful thing to see the Lord bringing a team together. We know that He will do great things on the island.

Thank you for your support of this ministry. We are praying for all of you.

Jack & Melinda

**Please pray for the following requests each time you think of us:**

1. Receptive hearts on Nukuoro
2. Supplies and household goods
3. Travel safety and health
4. New supporting churches
